Chavez Road Multi-use Trail Project Update

Date: June 2, 2023

The Village of Los Ranchos has contracted with Parametrix Engineering to prepare a study and preliminary design of a multi-use trail project from Tinnin Road Blvd. to 4th Street. A notice to proceed was issued to Parametrix on June 1, 2023 to begin with survey control, location survey and topographic mapping.

Parametrix plans to conduct the field topographic surveys beginning on Monday 6/5 and will run weekdays through Friday 6/16 which will include the following activities:

- Survey crew will be working along the Chavez Road corridor between 4th Street and extending west of Rio Grande Blvd. to the Gallegos Lateral with activities confined within the approximate ROW (roadway areas between existing fences and walls).
- Surveys will consist of taking survey measurements of all planimetric and topographic features utilizing both GPS and conventional survey procedures. Features will be marked minimally with white water-based paint dots.
- “Survey Crew Ahead” caution signs will be placed along the eastbound and westbound shoulders of Chavez Road to alert motorists to survey activities in the areas being surveyed in 1000’ segments.

The Village will provide public information on a continuous basis throughout the project. Please monitor the Village website at www.losranchosnm.gov or contact the project manager with specific questions. The first Public Information Meeting will be held in September and notice will be provided by flyer distribution, public postings, and on the website.
